INFORMATION

2019 ROTAX MAX CHALLENGE EURO TROPHY MICRO MAX

CONCERNS : EXHAUST MICRO MAX

2019, March.

We would like to announced the following modification regarding the Exhaust system. (Article 1.40 Technical Regulations Micro Max).

The steel isolation mat is not allowed during the Rotax Max Challenge Euro Trophy for Micro Max

Each entrant has to buy a new isolating mat through the organization during registration (voucher system).

After the last practice session on Friday before the event all mechanics have to come with the exhaust to the Scrutineer. The exhaust should be dismounted from the chassis and should be clean.

The exhaust should be fitted with this new isolating mat in the presence of the technical scrutineer. Once the isolating mat is fitted, the exhaust will be sealed with a barcode seal. All exhausts stay in Parc-Ferme area during the event.
